

KNOW your BATTERIES - WHERE and HOW to SAFELY DISPOSE and RECYCLE them

Battery Type:

Zinc Air

Mercury Oxide and Silver Oxide

Common Uses:

Watches
Cameras
Medical Devices
Hearing Aids
Aircraft

Dispose and Recycle:

Batteries can be placed in the Battery Tubes located at the Supermarket and Commercial locations.

Battery Type:

Lithium

Common Uses:

Watches
Cameras
Handheld Electronics
Tire-Pressure Sensors
Alarms
Pacemakers
Remote Car Locks
Smoke Detectors

Dispose and Recycle:

Batteries can be placed in the Battery Tubes located at the Supermarket and Commercial locations.

Battery Type:

Alkaline &
Zinc Carbon

Common Uses:

Smoke Detectors
Cameras
Toys
Watches
Handheld Electronics

Dispose and Recycle:

Batteries can be placed in the Battery Tubes located at the Supermarket and Commercial locations.

Battery Type:

Lithium-ion (Li-ion)

Common Uses:

Cellphones
Tablets
Laptop Computers
Wireless Accessories
Power Tools
Video cameras
Handheld Electronics
Electric & Hybrid Automobiles

Dispose and Recycle:

Batteries can be placed in the Battery Tubes located at the Supermarket and Commercial locations.

Battery Type:

Nickel Metal Hydride

Common Uses:

Older Cell phones
Older Laptop Computers
Power Tools
Cameras
Handheld Electronics
R/C Hobby Vehicles
Early Hybrid Automobiles

Dispose and Recycle:

Batteries can be placed in the Battery Tubes located at the Supermarket and Commercial locations.

Battery Type:

Nickel-Cadmium (NiCd)

Common Uses:

Older Cellphones
Older Laptop Computers
Power Tools
Handheld Electronics
Toys
R/C Hobby Vehicles
Medical Equipment

Dispose and Recycle:

Batteries can be placed in the Battery Tubes located at the Supermarket and Commercial locations.

Battery Type:

Automotive Lead Acid

Common Uses:

Automobiles
Motorcycles
Boats
Outdoor Power Equipment

Dispose and Recycle:

Batteries can be delivered to the 24 hour drop off site or recycling processing area in the George Town Landfill and Cayman Brac Landfill during operational hours.

Battery Type:

Electric Automotive Battery from a fully electric vehicle. Large Li-ion dry cell, sealed, rechargeable.

Common Uses:

Fully Electric Vehicles
Micro Mobility Devices

Dispose and Recycle:

Batteries can be delivered to the recycling processing area in the George Town Landfill and Cayman Brac Landfill during operational hours.

Battery Type:

Hybrid Automotive Large, dry-cell batteries, NiMH and Li-ion most common, sealed, rechargeable

Common Uses:

Hybrid Automobiles

Dispose and Recycle:

Batteries can be delivered to the recycling processing area in the George Town Landfill and Cayman Brac Landfill during operational hours.
