

Proposed Letter for CHOGM:

Dear Commonwealth Chair in-Office,

We the below promise to advocate to our Heads of Government to support the concept of the creation of a Commonwealth Climate Change Council. The councils' responsibilities will encompass, but are not limited to, the collection of, monitoring and tracking of natural disasters and natural catastrophic events connected to, or caused by global warming. The creation of such a council will raise the standard of awareness and assist with the preparedness of, and avoidance of natural disasters affecting commonwealth member states.

We the member states all are affected in one way or the other by the likes of hurricanes, tropical storms, earthquakes, rising water levels, flooding, temperature levels, tsunamis, ocean acidifications, monsoons and droughts, and advocate for a collective approach to monitor the effects of these events.

It is in our best interests from a financial, moral and economic standpoint to have such a council as many member states may not be able to afford the required resources, technology and labour necessary for such a commitment. With the ever growing concerns around the negative effects of climate change, we the below signatories see the urgency of the creation of such a council forthwith.

We advocate the creation of a committee and action plan from the CHOGM to address the effects of global warming and natural disasters for Commonwealth members to establish a remit for the Commonwealth Climate Change Council.

This promissory note will be carbon copied to the following names with the hope of the topic being placed onto the agenda as a priority matter for discussion and commitment at CHOGM:

Hon. Emilia Lifaka MP, Chairperson of the CPA Executive Committee

Baroness Patricia Scotland, Secretary General of the Commonwealth Secretariat

Mr Akbar Khan, Secretary-General of the Commonwealth Parliamentary Association

Theresa May, in her capacity as incoming Chair in Office of the Commonwealth

Jeremy Corbyn, Leader of the UK Opposition
